Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-10 and 19-28 drawn to a method of assigning a time slot for delay-sensitive or non-delay-sensitive application (using time division multiplexing), classified in class 370, subclass 314.

II. Claims 11-15 and 29-33 drawn to the method of determining which packet of a plurality of packets should be transmitted next (flow control of data transmission through a network), classified in class 370, subclass 235.

III. Claims 16-18 and 34-36 drawn to a method for selecting a protocol for transmitting each packet over the wireless channel base on the service type (Multi-protocol network), classified in class 370, subclass 395.5.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions or they have different effects. (MPEP 806.04, MEPE 808.01). In the instant case the different inventions have different modes of operation, different functions, and they have different effects.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification because of their recognized divergent subject matter, and the search required for each Group I, II

Art Unit: 2664

or III is not required for other Group, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
